Re: "Sie waren unsere Nachbarn: Jüdisches Leben in Teltow bis 1945"

We write in testament to the excellent work of Dr. Gabriele Bergner concerning her responsibility for the above mentioned exhibit.

We are descended from a formerly well-established, Jewish family with roots in the Teltow area. Our interest was initially piqued when Dr. Bergner contacted us for assistance with her research identifying and cataloging the various documents, pictures and videos pertaining to the time between 1933 and 1945. Dr. Bergner was able to identify important pieces and guided us through the process of remitting this evidence back to her.

Over time, Dr. Bergner showed dedication and diligence in tracking down not only our family story, but also that of former neighbors and townspeople. Her exuberance for the work was clearly evident in her patience and careful guidance over the years leading up to this exhibit.

Dr. Bergner's excellent coordination and presentation of the artifacts, documents and videos also helped bring these old stories back into the light in a professional and well architected manner. As we can also attest, the exhibit transcended language barriers in getting its message across.

We are extremely pleased with the results of the exhibit and its corresponding documentation (Katalog), and all the more so to have a permanent and inarguable record of the history of these trying times.

Dr. Bergner's efforts amount to nothing short of a respectful and positive contribution to the fabric of our shared society and we are grateful for her efforts.
